PROFESSIONAL RETAIL SOLUTIONS

Solutions

With our extensive product and service portfolio, we provide turnkey solutions for your retailing investments and logistics needs, from project conception to assembly.

Flexible and Fast

We respond quickly to your demands with a flexible production infrastructure and an experienced team.

About Us

Sigma has been adding value to your business for 20 years with its 4,000 square meter production and storage center in Tuzla, Istanbul. With its modern machine park, expert R&D, design, and production team, sales, and after-sales technical service, it provides quick solutions to your needs.

Our company has combined knowledge, design, and technology and carried it to the future since its founding; it designs and manufactures market equipment and logistics sector vehicles with its strong innovative and professional team.

Our production process, which begins with the precise selection of raw materials, is flawlessly completed, with each product passing the durability test and quality certification.

Innovation

We place a high emphasis on developing new products. We add value to our customers' lives by creating stylish, ergonomic, comfortable, and efficient products.

International

We serve many countries in Asia, America, and Arab countries, particularly Europe, in the retail and logistics sectors.
